ARCANA AI

Your interests become a persona you can play

A visual social platform with
Tarot-inspired identity and card PvP

The opportunity: collections as identity

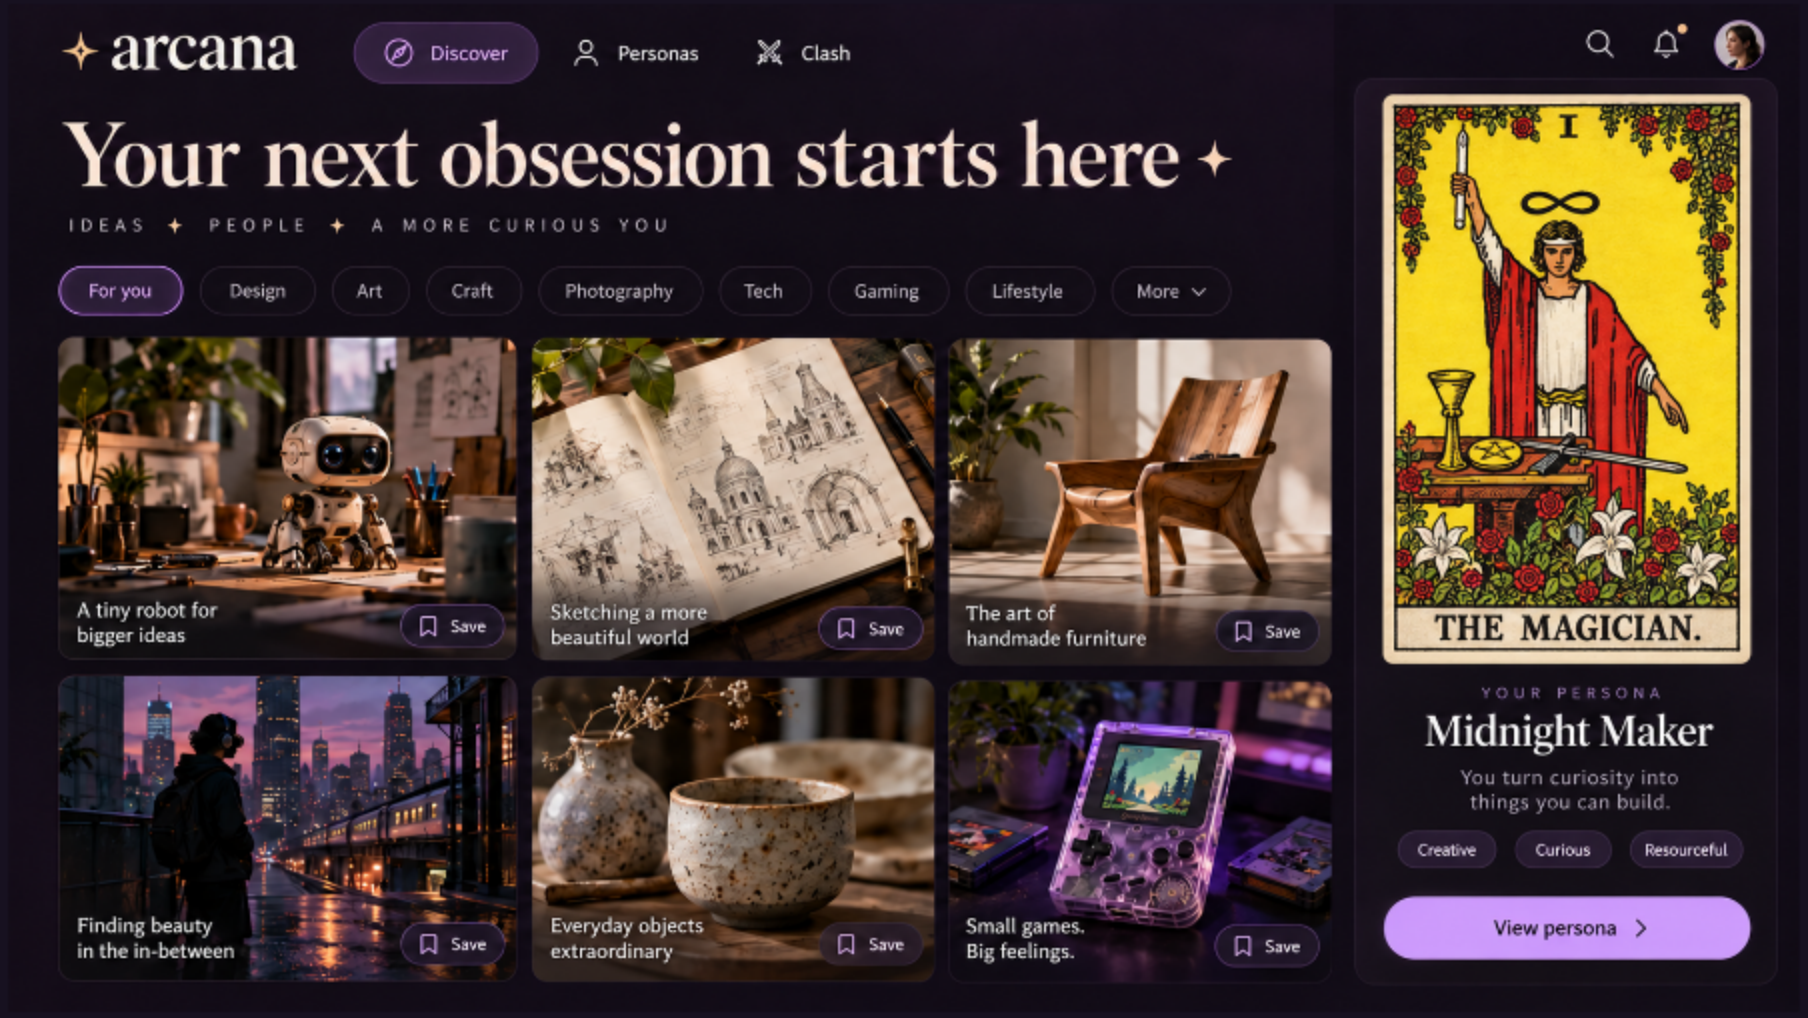

A board shows what you like.
Arcana gives it a character.

Starting audience

Creative collectors and casual game fans
who enjoy expressing different sides of themselves.

Product hypothesis: a playable persona gives collecting a social purpose.

Discover interests. Build a persona.

Proposed UI mockup

A persona grounded in your pins

THE INPUT

Robotics
Architectural sketchbooks
Handmade furniture

THE PERSONA

Midnight Maker

Primary Arcana: The Magician

You turn curiosity into
things you can build.

Specific interests explain the mapping. The user edits and accepts the identity.

Tarot Clash: a social reason to play

Proposed UI mockup. Rules resolve the result. AI narrates the battle.

The archetype engine

01 **JSON archetypes**

A shared vocabulary of meanings, strengths, and tensions.

02 **Pinned interests**

The evidence behind each persona and card mapping.

03 **Structured AI output**

A persona, its Arcana, and explanations the app can validate.

04 **Separate battle rules**

Consistent outcomes with AI commentary for entertainment.

Python / Streamlit / OpenAI API / JSON

Prototype status and hackathon scope

EXISTING PROTOTYPE

Three Streamlit modes

OpenAI API function

Mapped application logic

PROPOSED DEMO

Curated discovery feed

One editable persona board

Local or seeded-opponent Clash

Later: production accounts, real-time multiplayer, recommendation ranking.

The judge demo

1. Save a few interests
2. Reveal Midnight Maker
3. Challenge a persona
4. Play a round and rematch

A collection you can express and play
